

End-to-end automation platform SCIO Automation showcases its intralogistics solutions at LogiMAT 2023

Frankenthal, March 2023. International automation platform SCIO Automation will present its intralogistics portfolio for the first time, alongside its brands 4am Robotics, MFI, Schiller Automatisierungstechnik, PrintoLUX and Modumaq at LogiMAT (East Entrance, Booth ES51). The focus of their presentation is SCIO's vision of flexible and customized warehouse automation as an integral part of the Smart Factory. This includes flexible and safe Autonomous Mobile Robotics solutions, industry-specific and comprehensive material handling, and a warehouse logistics portfolio, as well as services that go beyond it, such as an industrial labeling system.

Founded in 2019, SCIO Automation Group is an international business platform for industrial end-to-end automation. It now includes 10 independent corporate brands at 30 locations worldwide that pool their expertise in intralogistics, production and process automation as part of SCIO. This allows SCIO to support its customers in a holistic way, with personalized solutions that cover a vast array of areas within the smart factory concept, including product innovations that are specific to each customer.

SCIO Automation and several SCIO brands will bring the digital transformation of intralogistics to life at their joint LogiMAT booth ES51, East Entrance by exhibiting products, presentations and videos. MFI GmbH, 4am Robotics, Schiller Automatisierungstechnik GmbH, Modumaq Technologic Solutions and PrintoLUX GmbH will also be at the event. In addition to solutions that are designed to provide versatile warehouse and material flow, and showing off some new developments in mobile robotics, the group of companies will be presenting its patented PrintoLUX® labeling process, including its latest printing system development, SIGNO, which has been designed for industrial use.

The intralogistics portfolio at the SCIO Automation Group includes integrating flexible, fully automated warehouse and material flow solutions, as well as mobile robotics along the entire warehouse value chain:

- Heterogeneous portfolio of Mobile Robotics solutions that are flexible, safe, and almost always available for use: Autonomous Mobile Cobot, Autonomous Tugger Train Indoor and Outdoor, Autonomous Forklift.
- Turnkey high-bay warehouse solutions
- Complex and customized clean room storage solutions and conveyor systems up to ISO class 3
- (Deep-freeze) storage and material handling solutions, designed and built in line with the principles of hygienic design
- Automation solutions for material flow, picking, packing, palletizing and shipment preparation
- Flexible warehouse management software solutions for smooth and fully integrated processes

These automation solutions are tailored to customer needs in a wide range of industries. Whether it's retrofitting existing plants or building new ones, SCIO fully integrates its solutions into existing IT systems, enabling flexible and fully automated end-to-end process chaining in logistics and production.
